

Lice Ice™ gel stops lice the safe, natural way by effectively trapping them in a hardened herbal gel\*. Just ice those lice and rinse them away for good!

## Instructions

1. Apply LICE ICE™ gel generously to DRY hair.
2. Massage gel well down into scalp and hair roots, making sure to get all the hair encased in the gel. Lice Ice must air dry completely.
3. Leave on at least 8-15 hours—this may be overnight. Do not cover hair. Do not put into a ponytail or a bun.
4. If properly applied, all lice and eggs will be entirely encased in a hardened gel-making it impossible for lice to feed, lay eggs or for existing eggs to hatch.
5. Shampoo with regular shampoo, rinse well. Dry hair. Thoroughly check hair and scalp. Reapply if necessary.
6. Reinfestation is likely if the living environment has not been cleaned, or if you come into contact with head lice again.
7. Use Lice Ice daily in place of styling gel, or dilute gel 1:4 in water to use as a spray to guard against future reinfestations. You can use Lice Ice as a daily preventative or as often as infestation occurs.

One 8 oz. tube contains 3-4 applications. Normal application is 2 oz. Longer or thicker hair may require more.
